PROFESSIONAL SUMMARY

Applied Mathematics B.S. with a foundation in quantitative analysis, statistical modeling, and translating concepts and algorithms into code. Experienced using Python, R, and C++ to analyze multi-dimensional datasets, apply quantitative methods, and communicate findings clearly. Systematic problem solver who thrives in fast-paced environments while managing multiple tasks and working with others.

EDUCATION

Texas A&M University, College Station, TX

Aug 2021 – May 2025

Bachelor of Science in Applied Mathematics with a Cryptography Emphasis

TECHNICAL SKILLS

- Python, R, C++, SQL, LaTeX
- Statistical Modeling, Uncertainty Analysis, Quantitative Data Analysis using Python using pandas, matplotlib, numpy, and BeautifulSoup
- Mathematical Algorithms, Persistent Homology, Dimensionality Reduction

ANALYTICS PROJECTS

Texas A&M Math 478

Sept 2024 – Dec 2024

Topological Data Analysis

- Conducted quantitative research using Topological Data Analysis and persistence methods on professional Counter-Strike performance data to identify elite team similarities and predict top performers
- Applied persistent homology, Mapper algorithms, distance metrics, dimensionality reduction, and Python-based statistical workflows to analyze multidimensional datasets
- Communicated methodologies, findings, and predictive insights in a technical report, correctly predicting Natus Vincere as the top-performing team

WORK EXPERIENCE

Escape Room Extreme and The Par Pub, Largo, FL

April 2026 – Present

Game Master/Bartender

- Manage customer experiences and multiple operational tasks in fast-paced environments
- Lead escape room games, troubleshoot puzzles, and adapt communication to solve problems under time constraints
- Handle customer orders, payments, and requests accurately while maintaining strong attention to detail

Texas A&M MLC, Spartan Tutoring, College Station, TX

Jan 2022 – May 2025

Math Tutor

- Led structured tutoring sessions for multiple students simultaneously, requiring strong organization and communication
- Developed short term improvement plans aligned to exam timelines (typically 3 weeks)
- Clarify and achieve understanding with students through specific, difficult math problems and assignments
- Built long term relationships with students through progress tracking and goal alignment
